

AED Debitech Lifeline View

Seafarma offers the AED Defibtech Lifeline View.

This AED is taking easy-to-use to a whole new level. Other AEDs tell you what to do in an emergency. The Lifeline VIEW is the first and only one that shows you—with video in full-motion color. With award-winning design, durability and easy maintenance - backed by the Defibtech commitment to innovation and excellence - we can guarantee you've never seen an AED like this before.

One of the major problems with most AEDS is maintenance. Not with the Lifeline VIEW. The status screen gives you up to the minute information on maintenance if it's required. In addition, built-in video help gives you easy, step-by-step guidance on maintenance that supplements the user manual. Proactive reporting monitors the status of the device and its components.

Technical Specifications:

Type	Semi-automatic external defibrillator
Model	DDU-2300
